OctoView 3"

Smart, Compact, and Versatile

Full color display for local device monitoring

Plug & Play installation

Real-time insight into your generator

Monitoring of multiple WhisperPower devices

The OctoView 3 Inch is a powerful and compact display that enhances local monitoring and control, making your energy system—and your generator—smarter. Designed for both marine and land-based applications, its durable build ensures reliable performance in any environment. With an intuitive interface and easy installation, the OctoView 3 transforms your generator into an intelligent, user-friendly system, allowing seamless monitoring and efficient management of connected devices.

Genverter Piccolo

OctoView 3 Monitor

PMG Power Module Genverter (standard)

For local control of your generator, without an internet connection, the OctoView 3 is a valuable tool. It allows users to check battery levels, adjust shore current limits, and control WhisperPower generators—all with a simple press of a button. Thanks to WhisperConnect CAN bus communication, multiple devices can be monitored and managed locally, making it an ideal choice for local control of your on board generator and/ or power system.

OctoView 3 Monitor

OctoControl Gateway

PMG Power Module Genverter (standard)

Remote control of your generator is now available and easy to configure by adding the OctoControl Gateway to your system. Cloud connected, monitor and control your generator and/ or power system from wherever you are. By smart phone, laptop or PC, you have full control, always and everywhere. When connected online, the OctoView 3 enhances your control and accessibility.

OctoView 3

Art. Number 40280114

Specifications	
Display	2.8 inch, 320x240 pixels, full colour TFT
Dimensions	85 x 78 x 31 mm
Weight	<0,5 kg
Protection degree	IP20
Mounting	Panel mount (cutout: Ø65 mm, 4 screws included)

Integrated into a WhisperPower system, it automatically detects and displays all connected devices via the WhisperConnect network. The configuration wizard simplifies setup, ensuring a hassle-free experience. Whether used for standalone monitoring or as part of a larger energy management system, the OctoView 3 offers convenience, efficiency, and seamless connectivity.
